

Community Relations

Visitors/Outsiders

Pursuant to this policy, constituent visits to the schools are subject to the following procedures:

1. All visitors will first contact the office to state their business on campus and to request permission to visit a program. Since the principal may need to consult with the teacher to insure that normal classroom activities will be underway at the time of visitation, such contact is preferable in advance.
2. All visitors should register at the school's office before they proceed to the particular classroom or program.
3. Visitors wishing to eat on the school premises may need to make arrangements in advance.

If the principal has reason to believe that a school visit by a constituent is inimical or threatening to the instructional purpose of the school or intimidating to pupils and/or employees, procedural restraints will be imposed. Such restraints will be based upon the circumstances of the particular cases.

Restraints on visitation based upon any of the following reasons would be considered valid:

1. The person is known to be violent.
2. The person is known to be intrusive.
3. The visit would negatively affect the teacher/pupil relationship.
4. The classroom has been visited too heavily in the past, and the request must be delayed.
